

Design with intelligence, deliver with excellence.

Build smart infrastructure and optimize operations with our industry-leading team of supply chain consultants

Supply Chain Strategy Consulting

We solve key questions of inventory strategy, network design, technology roadmaps, and S&OP. Our data-driven solutions are capital-justified and focused on what makes sense now and in the future.

Technology

We select, implement, integrate, and support business management (ERP), warehouse technology and supply chain execution software.

Distribution Center Design

Whether you're running out of space, operating inefficiently, or struggling with labor costs, LIDD leverages data to design, reconfigure or automate your location to drive productivity.

Facility Implementation

Occupy ready-to-use facilities on-time and on-budget. We provide a range of services from turn-key commissioning to equipment selection.

LIDD

DIGITAL TRANSFORMATION

Maximize supply chain performance by integrating advanced digital infrastructure with your operation's physical capabilities.

Digital transformation goes beyond tech; it's about understanding your operations, data, delivering scalable architectures, and gaining long-term confidence in your digital systems, physical infrastructure, processes, and people.

Empower your employees to make better decisions, and gain the flexibility to grow wherever opportunities take you.

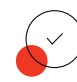

Benefits

Sharpen your Supply Chain Edge.

Respond to dynamic environments and go beyond a near-term strategy to build long-term capabilities that will create or sustain a competitive advantage.

 **Efficient**
Boost internal efficiencies and implement governance to streamline workflows and operations, leading to improved customer satisfaction and increased revenue

 **Scalable**
Develop the infrastructure needed to scale operations and position the business for sustainable growth in the long term.

 **Responsive**
Gain control and visibility into complex interconnected environments, enabling agile responses to meet changing market conditions

Services Offered

Our digital experts collaborate with you to develop scalable architecture that allows your physical and digital infrastructure to grow in tandem with your business.

Digital Transformation Roadmap (DTR)

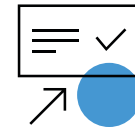

About LIDD's DTR Process

Diagnosis

Our consultants gather requirements and assess your current state to identify opportunities and pinpoint gaps between your current systems and the desired future state.

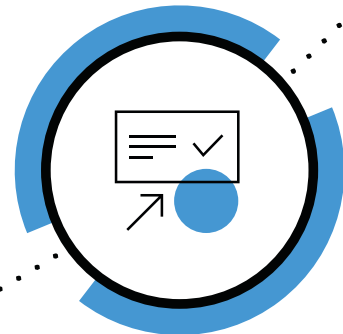

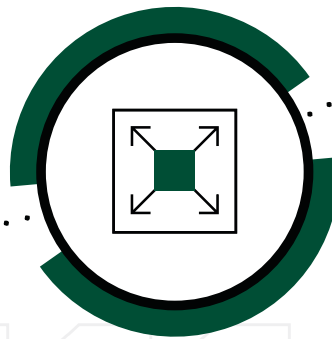

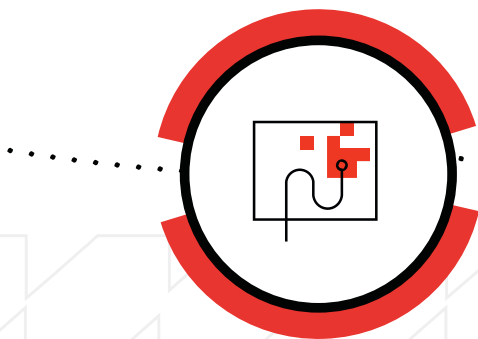

Design

We evaluate the identified opportunities and craft the system architecture needed to enable your future state processes and meet predefined requirements.

Recommendation

We provide detailed solutions, integration plans, and deployment strategies for each step of your digital adoption roadmap.

Why LIDD

Clients choose to work with LIDD for digital transformation needs because we have the industry experience, technical expertise, and strategic mindset to drive meaningful results.

Certified Digital Transformation Advisors

Our team is composed of certified digital transformation advisors recognized for our ability to design, build and scale any operation.

People-Centric Approach

We empower clients with the skills and understanding needed for sustainable transformation.

Pragmatic Approach

As many of our advisors come from an engineering background, we assess technology to support the process, not the other way around. This allows us to lead you through successful transformation, ensuring your technology provides value.

Agile Implementation

We assist organizations in responding to real-time digital disruptions while maintaining a forward-looking approach by establishing strategic and iterative implementation schedules.

Proven Process

From diagnosis, strategy development, implementation, and continuous improvement, we have helped organizations of all sizes and industries.

Capital-Conscious Decisions

We ensure resources are allocated efficiently by justifying right-sized investments aligned with financial priorities, regardless of the scale or scope of the transformation.

Contact us today contact@lidd.com or visit www.lidd.com to schedule a consultation and discover how our supply chain expertise can supercharge your business.

SUPPLY CHAIN OPERATIONS AUDIT

LIDD's operations audit relies on a multi-disciplinary approach to give you a clear picture of your current state and to develop recommendations that will empower you to meet future demand.

SUPPLY CHAIN

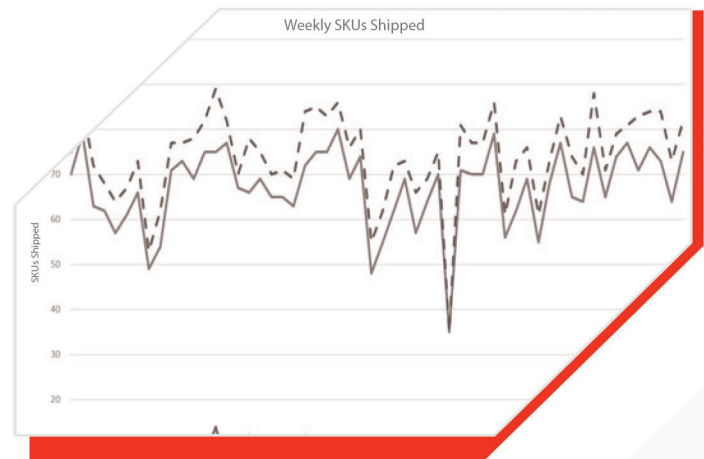

01 VISIT OPERATIONS

LIDD experts visits your facility to audit your current operations. The team spends 1-2 days on site to:

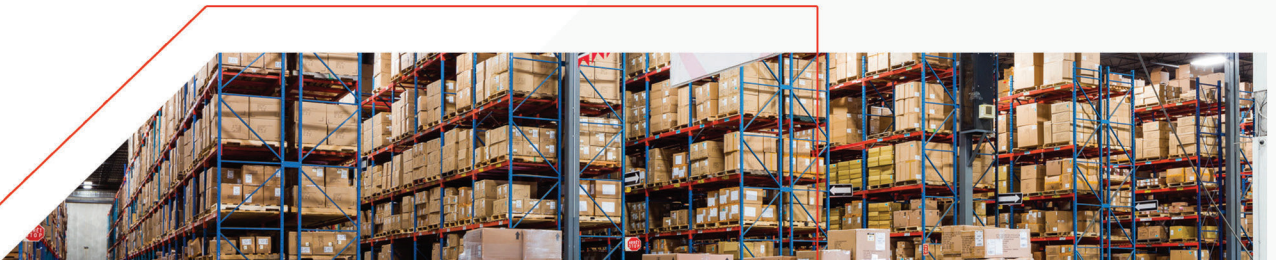

- Observe processes and record how employees use space, equipment, data and software
- Measure your building and equipment accurately
- Meet staff in Procurement, Operations, Logistics and Finance

02 MODEL & ANALYZE DATA

We analyze your transactional data related to items, customers, sales orders, production orders, and on-hand inventory to detail all the key features of your current operation, such as:

- Size and profile of inbound and outbound orders
- Seasonality and peak periods
- Productivity per functional area
- Current capacity utilization
- Ideal storage, processing and dock space
- Potential improvements to processes and/or software

OPERATIONS AUDIT

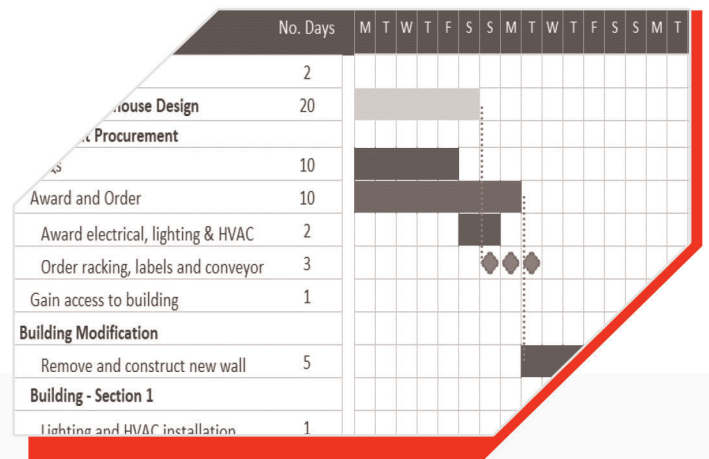

03 DEVELOP FUTURE OPTIONS

In collaboration with you, we develop different future state roadmaps that indicate the risks and ease of implementation and that define:

- Size and volume supported
- Process flows and CAD layouts with required equipment
- Required reconfiguration of existing software and processes
- Required capital investments, including CapEx and OpEx
- Flexibility and scalability

04 RECOMMEND A PLAN

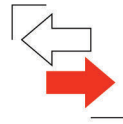

After a thorough evaluation of the available options, LIDD recommends the optimal supply chain infrastructure for your company's future. This roadmap contains:

- Refined process descriptions, drawings and budgets
- Explanations for required software modifications
- Justifications for capital investments
- High-level project plan and timeline for investments in the new infrastructure

Why LIDD?

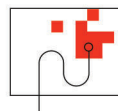

Integrated Offering

Fully integrated suite of services for physical & technology assets. We can help with everything from design through implementation.

Industry Veterans

LIDD's project teams are lead by highly experienced professionals. Project leads have each managed dozens of supply chain consulting mandates — both studies and implementations.

Data Driven

LIDD uses advanced analytics software and transactional data to design the optimal operating strategy.

Our Supply Chain Infrastructure Services:

Distribution Center Design

- Facility design and sizing
- Omni-channel
- Infrastructure roadmap
- Facility migration

Supply Chain Strategy

- Network optimization
- Operations audit
- Process improvement
- Automation assessment
- 3PL / Contract manufacturer management

Technology

- Digital transformation roadmap
- Selection of WMS, MES, TMS and ERP software
- Integration and optimization of systems
- WMS & ERP implementation & support
- NetSuite and Microsoft Dynamics ERP partners
- Generix Solochain and Körber WMS partners

SUPPLY CHAIN TECHNOLOGY SOLUTIONS

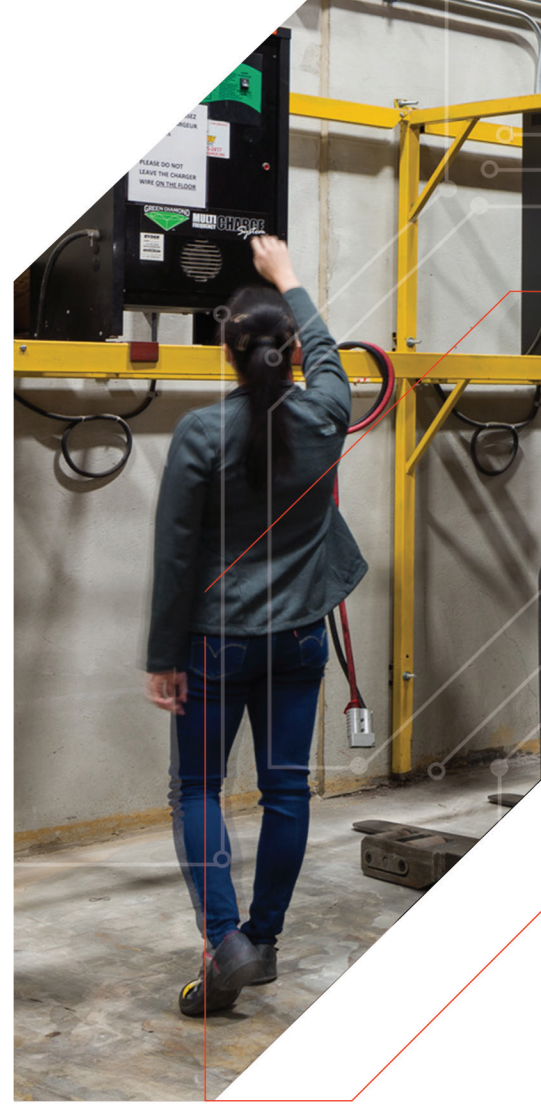

LIDD experts perform rigorous technology audits, develop detailed roadmaps, and implement the right software solutions to help distribution and manufacturing companies keep pace as markets grow, new products appear, and innovative sales channels arise.

SUPPLY CHAIN TECHNOLOGY EXPERTISE

In the last ten years, LIDD has established itself as a North American leader in helping distribution and manufacturing companies implement business software solutions that are tailored to their requirements. Working in close partnership with the client's team, we perform thorough audits of existing software architecture, develop future state roadmaps, and manage the selection, implementation, development and continuous improvement of ERP systems, WMS, MES, QMS, TMS and API software. LIDD enables companies to:

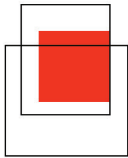

- **Scale for growth** by setting up systems that can handle vast increases in the volume and variety of transactions.
- **Improve efficiency** by implementing software systems that streamline processes, support labour activities, and reduce cycle times.
- **Reduce dependence on tribal knowledge and prevent information gaps** thanks to business solutions that track internal processes and customer requirements in real-time.
- **Reduce error ratios across disconnected systems** by integrating systems architecture and defining which systems hold master data.
- **Enable traceability**, from raw material consumption to finished goods distribution.

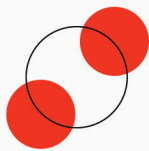

SUPPLY CHAIN TECHNOLOGY SOLUTIONS

ARCHITECTURE

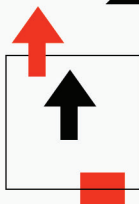

- Supply Chain Systems Audit
- Future-State Software Road-Mapping
- Systematic Process Flow Transformation
- Systems Integrations
- Benchmarking
- Automation

SOFTWARE IMPLEMENTATION

- Microsoft Business Central
- Microsoft Navision
- Oracle Netsuite
- Generix Solochain WMS, MES & QMS
- LIDD Supply Chain Suite
- LIDD Food Connect
- Rescues & Sprints

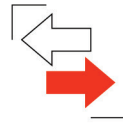

INTEGRATION, SUPPORT & CONTINUOUS IMPROVEMENT

- ERP, WMS, MES, TMS, MRP & OEE
- EDI
- Systems-to-Systems API

Your **Trusted Partner** in

Warehouse Technology

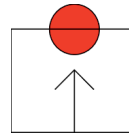

At our core, we recognize that the key to success for any business lies in its operations. Our expertise lies in seamlessly integrating state-of-the-art Warehouse Management Systems (WMS) and Manufacturing Execution Systems (MES) to drive operational excellence.

At LIDD, we are committed to offering comprehensive WMS and MES solutions that fit your unique business needs. Our services include:

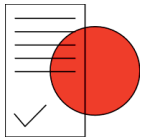

Assessment & Roadmaps

Our team of industry experts will conduct a thorough and objective assessment to identify opportunities for optimization and build strategies that align with your business goals. Collaborating closely with your team, we ensure our recommendations fully address your specific needs.

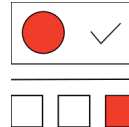

Implementation

Integrate new WMS systems into your existing infrastructure, whether it is with Enterprise Resource Planning (ERP), automation or otherwise. Our 6-step implementation process minimizes disruptions and maximizes potential for process improvements and cost savings.

Training & Support

Empower your workforce with the knowledge and skills needed to extract the utmost value from your WMS and MES. Our comprehensive training courses are designed to familiarize your team with the software's functionalities and best practices, ensuring a smooth transition.

Continuous Improvement

We're not just about the initial implementation - we're here for the long haul. Our commitment to continuous improvement means that we'll regularly assess your operations, fine-tuning the configurations and strategies of your WMS and MES to stay in line with your evolving business demands.

WMS & MES

Partners

Our strategic partnerships with industry-leading WMS & MES providers bring a comprehensive range of features that drive efficiency, enhance visibility, and fuel growth in your business. With our in-depth understanding of system capabilities, we guide you in selecting the right software, ensuring a seamless fit for your operations.

LIDD stands out as the leading implementation and support partner for Solochain & Körber, both acknowledged leaders on the Gartner Magic Quadrant.

Generix Solochain

Amplified Efficiency

- Advanced inventory tracking and management
- Accurate, real-time inventory visibility across your distribution network
- Highly configurable workflows scalable to your needs for efficient order processing and fulfillment
- Intuitive user interfaces that are adaptable and easy-to-use for rapid onboarding, available in multiple languages
- 3PL Billing engine to capture charges in real-time
- Flexible integration capabilities

Leading Manufacturing Capabilities

- Track manufacturing, production, and kitting of inventory across the application
- End-to-end forward and backward traceability of raw materials, components and finished goods

Enhanced Collaboration

- Streamlined communication across teams and partners
- Data-driven insights for informed decision-making

Körber

Scalability and Versatility

- Scalable architecture to accommodate growth
- 3PL and multi-site capabilities for complex operations
- Optimized labor management and resource allocation
- Adaptive workflows to accommodate dynamic business needs
- Supports significant transaction volumes
- Integrates with a wide software portfolio, including, but not limited to, Order Management System (OMS) and Transportation Spend Optimization (TSO)

Global Presence

- Advantageous global presence for companies with sites located across different regions and time zones
- Multiple configurable languages for both voice picking and the WMS

SUPPLY CHAIN DATA ANALYTICS

LIDD stands out as a trusted digital advisor in leveraging the power of data analytics. Offering comprehensive solutions that combine supply chain expertise with business analytics to drive operational excellence.

**Future-Proof
Your Supply
Chain**

**Improve Forecasting
& Demand
Planning**

**Enhance Visibility
& Real-Time
Insights**

**Reduce Costs
& Improve
Margins**

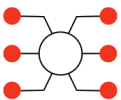

Bridging the gap between data and decisions with LIDD's expertise.

Our data analytics expertise goes beyond numbers. We guide you in transforming raw data into actionable insights, empowering you to make informed decisions that improve supply chain management and organizational decision-making.

Define the right KPIs

Identify the KPI's that truly impact your business, ensuring you measure what matters most.

Connect your data

Integrate and consolidate data to create a centralized data warehouse for efficient analysis.

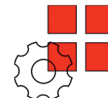

Understand your Data

Gain a holistic view of your data ecosystem and create a strong foundation for further analysis.

Build actionable insights & reports

Deploy reporting capabilities to track and visualize metrics, enabling independent access, analysis, and utilization of data

Extract your data

Gather and consolidate diverse data sources, ensuring a comprehensive and accurate foundation for analysis.

Grow with your data

Leverage training & support to ensure your company remains self-sufficient in adapting to changing needs and objectives.

Contact us today contact@lidd.com or visit www.lidd.com to schedule a consultation and discover how our data analytics expertise can supercharge your supply chain.

Why choose LIDD as your trusted data analytics advisor?

With over a decade of industry-leading experience, LIDD leverages data analytics to empower businesses with tools to make informed decisions and solutions that drive results.

1 Build exceptional data experiences

- Gain valuable insights tailored to your business and key performance indicators (KPIs).
- Implement efficient data management systems to reduce manual data analysis and reporting.
- Receive hands-on guidance from our experts to ensure a smooth transition and effective utilization of data analytics solutions.

2 Architect to meet growing business demands

- Design efficient data management systems so that operations can expand smoothly and efficiently as your business grows.
- Establish robust governance frameworks, ensuring data security, compliance, and user access control.
- Ensure data accuracy, consistency, and compliance at a larger scale.

3 Fuel excellence at every level of your business

- Foster a data-driven culture that breaks down silos, promotes collaboration, and continuously improves supply chain operations.
- Make data-driven decisions to inform decision-making, identify growth opportunities, and enhance efficiency in the supply chain.

Harnessing cutting-edge tools for actionable insights.

Navigating the complexities of data management is no small feat. It demands the right business solutions and expertise to enable confident decision making

As data analytics and integration experts, we bring top-tier technologies to the table and ensure seamless implementation for transformative results in your business.

SALES & OPERATIONS PLANNING

Leverage LIDD's expertise in Sales and Operations Planning (S&OP) to navigate the complexities of today's business landscape.

Stay ahead of the competition with LIDD's S&OP advisory services.

Our expert team combines industry knowledge and cutting-edge technology to help businesses leverage existing resources, make informed decisions, and turn business strategy into action. Resulting in improved customer experiences and a stronger bottom line.

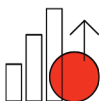

Improve cross-department communication

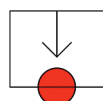

Prevent costly production errors

Improve forecasting & costs

Enhance agility & response times

Top-down management control

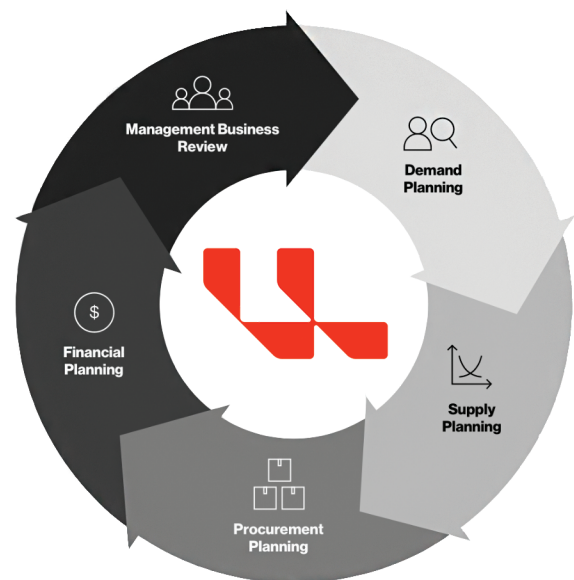

Reduce lead times

Get expert advice at every stage of the S&OP cycle.

A successful S&OP process revolves around shared data, prioritization of risks and opportunities, and balancing payoffs and tradeoffs.

At LIDD, we help businesses identify risks and opportunities to effectively balance supply with customer demand.

Let's get to know each other. Email contact@lidd.com to get in touch with a expert.

Building success together.

LIDD specializes in making good planning achievable, providing clients with a framework for building, maintaining, and executing an operational plan. We work with you to understand your unique needs, and deliver targeted solutions that drive results.

1 Roadmap Development

- Collaborative process: We work closely with you to create a roadmap tailored to your objectives.
- Action items based on industry best practices: Our team identifies key steps to reach your desired planning state using proven methodologies.

2 Technology Selection

- Right software solution: We assist in selecting the software that best suits your specific needs, ensuring optimal utilization of your capital investment.

3 Implementation Support

- Establish internal tools, resources, and training: We help develop your internal capabilities for independent planning cycles.
- Hands-on guidance: Our experts provide support throughout the implementation process, ensuring a smooth transition and effective utilization of the S&OP framework.

Future-proof your business with LIDD's S&OP expertise

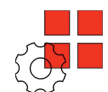

Achieve higher revenue

Accurate demand forecasting and better decision-making leads to improved revenue streams.

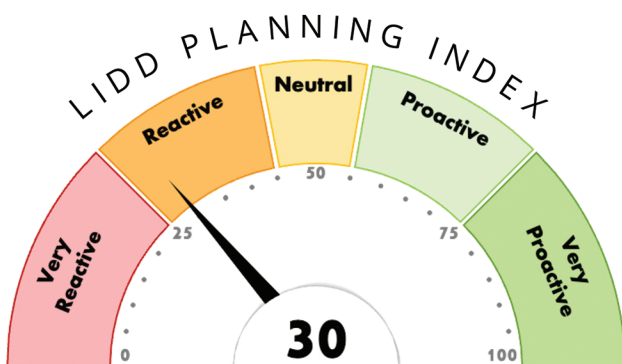

Enhanced customer service

Better planning and coordination results in improved customer service levels and satisfaction.

Reduce working capital requirements

Effective planning minimizes excess inventory and working capital needs, and lowers inventory shrinkage.

Where do you sit on the LIDD Planning Index?

Don't leave your planning process to chance. Unlock the secrets to effective operations planning and S&OP implementation with LIDD's free planning assessment.

Logistics Automation Readiness

Embracing logistics automation offers a prime opportunity to increase your efficiency, reduce costs, and improve customer satisfaction. Yet, it's crucial to remember that automation isn't fool proof. Thorough preparation of your project is imperative for a successful and smooth go-live.

YOU'VE CHOSEN YOUR AUTOMATED LOGISTICS SOLUTION. NOW WHAT?

Staying ahead means embracing automation. But without proper preparation, your automated solution can fall short. Protect your capital with a proactive implementation.

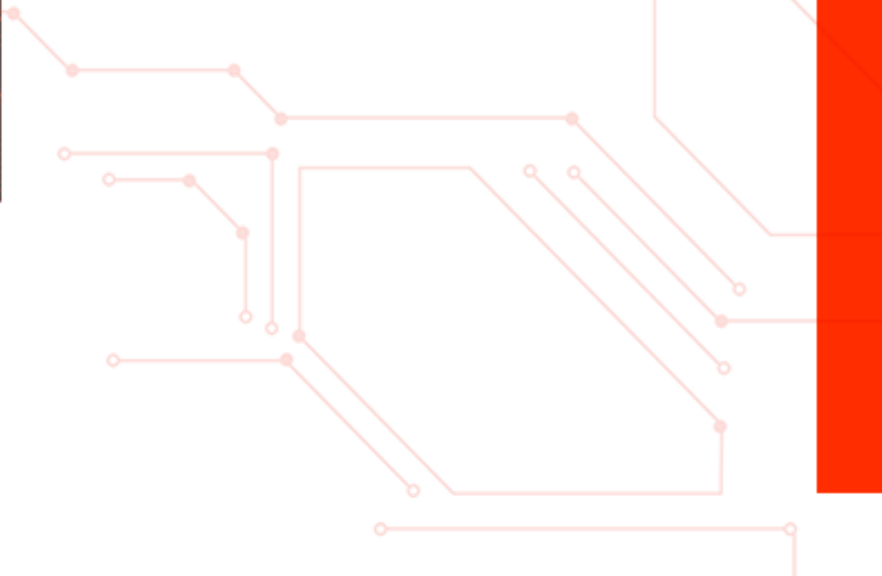

Let LIDD guide you through the complexities of logistics automation, ensuring a seamless implementation that propels your business forward.

CHOOSE LIDD TO MAXIMIZE YOUR INVESTMENT IN AUTOMATION

Automation isn't just about cost savings and reducing labor. Other factors can impact the success of your project. Assess risks and processes before implementing your automated solution. For expert guidance and preparation, trust in LIDD's expertise.

- **End-to-End Transformation:** LIDD offers a broad range of services beyond assessment, including feasibility studies, project management, and post-transition guidance.
- **Holistic Approach:** LIDD takes a holistic approach to automation, considering all stakeholders and their impact.
- **Risk Mitigation:** We identify and address potential challenges before implementation, minimizing disruptions.
- **Clear Visibility:** We provide insights into risks and process impact for better decision-making.
- **Transition Support:** Our experienced team provides continuous support throughout the entire transition, ensuring your team is equipped and confident to handle the change.
- **Customized Solutions:** We offer tailored solutions and guidance to meet your unique needs.
- **Competitive Advantage:** Leverage LIDD's team of experts and industry expertise to achieve operational excellence and stand out in the market.

IS YOUR BUSINESS READY FOR LOGISTICS AUTOMATION?

Find out in seconds. LIDD's free automation assessment tool provides a clear snapshot of your current state so that you can properly prepare for your implementation and maximize your investment.

Don't risk making costly mistakes or investing without a clear plan – let LIDD's assessment tool guide you toward successful automation implementation.

Have a clear view on the business impact and business case.

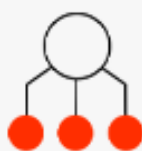

Have a supported solution by all internal and external stakeholders.

Reduce the operational, financial and implementation risks.

Manage your automation project proactively.

Structure your communication channels.

Prepare your facilities for the installation.

Assess. Identify. Act.

Scan the QR code to evaluate your automation readiness and receive a customized action plan from LIDD.

INVEST IN YOUR BUSINESS'S LONG-TERM
SUCCESS WITH **LIDD** AS YOUR TRUSTED
ADVISOR IN AUTOMATION READINESS.
