

WASTE NOT, FEED ALL

Implement scalable solutions that address food insecurity and minimize waste.

LIDD has helped **25+** non-profit organizations across North America involved in the fight against food insecurity map out the most impactful improvements across their processes, equipment, software and network to better serve their clients.

- **Do capacity constraints prevent you from reaching community agencies efficiently?**
- **Is inefficient routing restricting the capacity and responsiveness of your food rescue efforts?**
- **Looking to expand services into new areas like medically-tailored-meals, congregate programs, and home delivery to better serve your community?**
- **Is your digital infrastructure equipped to handle diverse procurement types, including USDA commodities, and effectively track fundraising streams while ensuring regulatory compliance?**
- **Are you operating on instinct instead of insight-driven actions?**

We build **strategic partnerships** with organizations like yours to **boost capacity** and **drive operational efficiency**, tackling these challenges head-on.

HOW LIDD CAN HELP

Know when to build, move, or automate.

We work with you to maximize the value of your current assets, right-size your technology, justify capital investments and help secure fundraising support.

Planning & Process Optimization

- Assess business processes to eliminate inefficiencies, reduce waste, and utilize building resources effectively.
- Gain foresight into community needs, accurately anticipate demand changes, and optimize inventory management processes.

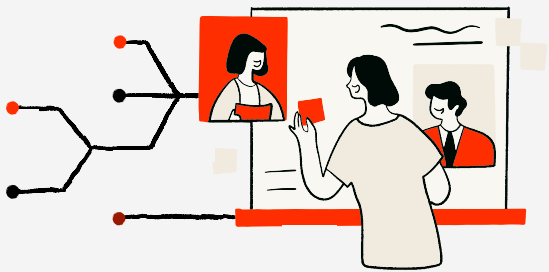

Infrastructure Expansion and Capacity Building

- Address facility constraints. Plan and implement infrastructure expansions, facility upgrades, and storage optimization initiatives to scale effectively and better serve communities in need.
- Design and implement efficient logistics networks and intelligent routing systems to utilize existing resources effectively.

Digitization and Technology Integration

- Is your current software portfolio outdated? Identify operational gaps and craft actionable plans to guide the design and use of technology for improved inventory management capabilities .
- Leverage our network of top partnerships with **ERP, WMS, CRM,** and **Supply Chain Planning** solutions, along with the necessary operational expertise for successful implementation, integration, and adoption.
- Define the right KPI's, create effective tracking systems, and use the data to make informed decisions, clearly convey results to stakeholders, and drive impactful outcomes.

At LIDD, our expertise is geared towards supporting your mission.

Let us help you strengthen your operational capabilities to better serve communities in need.
